Joan

Thanks.
I just spoke to Shawn and he has asked folks for some infor.
He is calling Bob.

Dan

Subject: Re bob p inquiry

Shawn, caroline just called me to say she is still on the train with bob and that bob had been trying to reach you. He read the ken ward article about the "new chemical identified" at the elk creek leak. Bob and caroline are questioning the last sentence in the article that says the CSB managing director said that the info came from the epa and he referred calls to epa. Bob wanted to know if we did speak with CSB and if so, what did we say. I just heard from fran burns who says our staff first heard about this PPH this morning at the routine "Job Meeting" and it was the facility owner who reported on the additional chemical, which represented 5.6 percent of "the material ". Fran shared the info with Dawn and with Lora Werner who is working with cdc to provide a statement. Fran expects that statement to be available sometime tonight. Again, fran is not aware that our folks gave any info to CSB. I didn't want to respond to caroline in the event you would like to respond to bob first. Please advise. Thx. Joan
